GENERAL NATURE OF DUTIES/RESPONSIBILITIES ASSIGNED TO THIS POSITION

Under general supervision, performs complex analysis, program design and maintenance, and programming tasks. Confers with customers/users to develop an understanding of their business objectives and application system needs. Participates in the preparation of technical specifications, work plans, test data and test packages.

POSITION SPECIFIC QUALIFICATIONS

Two years of full-time COBOL computer programming and analysis experience equivalent to a Programmer/Analyst which included the use of a third or fourth generation programming language (COBOL, CICS); applying knowledge of operating system control language(s), utilities, file design and databases (DB2); applying program testing techniques; researching, analyzing and solving complex design and/or programming issues.

PREFERRED QUALIFICATIONS

Two years of application development experience in COBOL, CICS, DB2 (this must be recent experience – within the past two years). Two years of experience using TSO/ISPF, ChangeMan, FileAid for DB2, MS Office. Ability to prepare program specifications, workplans, test data, and test packages. Willingness to work overtime or during non-standard hours when required. Effective communication skills and experience working directly with users and other technical resources. Ability to meet the terms and conditions of employment with the Information Technology Division.

COMMENTS

Due to the large volume of applications received by this office, only those applicants selected for interview will be notified of the final applicant selection.
